

SAM Registration

The First Step in Selling to the Government

Government Services Exchange has decades of experience in Government Contracting and Compliance. Selling to the government can help your business receive a steady form of income from the world's largest purchaser of goods and services. A **System for Award Management (SAM) Registration** is the first step in securing government contracts. If you want to do business with the federal government, registering with the SAM and receiving your CAGE code is required.

Optimizing your business to be registered under the **System for Awards Management** will provide the building blocks to selling your products and services to the government. It will also deliver a seal of approval, showing that you are a qualified and quality company that the government trusts.

GSE will Simplify the SAM Process

Of course, registering with the SAM is easier said than done. It takes expert knowledge and experience to appropriately fill out and submit the necessary paperwork.

GSE has **qualified specialists** on hand who can help **simplify the process** for your business. Don't worry about filling out the proper paperwork or submitting the correct forms; we will **handle it for you** and get you on your way to billions of dollars worth of federal spending.
